

A large white industrial truck, possibly a tanker or transport vehicle, is shown from a side-rear perspective. The truck is partially obscured by a blue and red geometric overlay. The background is a bright, hazy outdoor setting, likely a parking lot or industrial area, with sunlight creating a lens flare effect on the right side.

# LEAKTIGHT SOLUTIONS FOR AUTOMOTIVE AND INDUSTRIAL VEHICLES

**T-CORE**  
— solutions

Production of sustainable tank solutions based on customer request or standard brand sizes. Our development process involves first idea to full-scale production in close collaboration with the client.

The standard fuel-, combined- and hydraulic oil tanks are made in 2,5 mm aluminium, both side's coated with polymer and certified by **ECE type approval E24**. Beside the standard aluminium various materials are available to fulfill specific customer requests.

We support the market for 30 years with Leaktight solutions for automotive and industrial vehicles. Please feel free to challenge us for detailed information or inquiries.
